Written by Jonathan Corrales Jimenez
Work Plan Day 3
Due date: 30/12/2021 before 10:00 am
Objectives:
       -To check the created tables
       -To add foreign keys

Instructions
       1) Check the logic model and the other table documents on github to know the correct type of attribute for your foreign keys.
       2)Check the the other table documents on github to know the correct column name and space for your foreign keys.
       4)Create an alter table .txt document for each table that you were responsible on Work Day 1 and Work Day 2
       5)Comment on your entities "Foreign key ready"
       6)Upload a txt document as follows : nametable_foreignkeys.txt to Foreign Keys Branch on the project's github.
